!!!Texas A&M University

The university is home to almost 60,000 students, including more than 44,000 undergraduates, which makes it the sixth-largest university in the nation. Texas A&M University's Dwight Look College of Engineering is the largest on the university's campus with more than 12,000 students utilizing it. Students can choose among bachelor's, master's and doctoral degree programs within the college. Students who utilize this college's programs have access to Texas A&M's computer servers, modern workstations, disk servers and supercomputers.

The bachelor's degree program prepares graduates for careers within the computer industry. Students learn how to solve computer-related issues, communicate effectively both through the written and spoken word, function within a team setting and use computing tools. Students also choose a concentration area from another department. Students have several options—including robotics, algorithms, software systems, and networking.
