The University of Denver (DU) is composed of eight schools and colleges, enrolling over 11,000 students while maintaining a student-to-faculty ratio of 9 to1 and an average class size of 20. Approximately 90% of its full-time faculty members hold doctorate degrees, the highest academic degree attainable.

Undergraduate students majoring in business information and analytics complete core business courses in business law, financial reporting and public policy. Major courses include studies in data warehousing, information management and analytics. Business students can minor in business information technology, where students take an additional course in collaboration systems.

A 58-credit program, the Master of Science in Business Intelligence (MSBI) option focuses on developing skills in information technology and statistics. Courses include an introduction to business intelligence, data warehousing, project management and predictive analytics.

To fulfill the core requirements in the MBA/MSBI option, students choose from a list of information technology courses, including business intelligence, databases and project management. Core coursework includes financial accounting, organizational dynamics, strategic management, information technology strategy, business law and public policy.
